Examiner's Amendment / Reasons for Allowance

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mary Lou Wakimura on 3/23/06.

The application has been amended as follows:

Begin amendments

Claim 1, on line 11, replace the phrase "goal; and" with --goal;--.

Claim 1, on line 13, replace the phrase "identified." with --identified; and--.

Claim 1, after line 13, add the phrase --wherein the response is a computer application program command based on the utterance representation.--.

Cancel claim 8.

Claim 17, on line 2, replace the phrase "a computer usable medium for" with --a computer for--.

Claim 17, on line 4, replace the phrase "the computer usable medium," with --the computer readable medium,--.

Claim 17, on line 16, replace the phrase "goal; and" with --goal;--.

Claim 17, on line 18, replace the phrase "identified." with --identified; and--.

Claim 17, after line 18, add the phrase –wherein the response is a computer application program command based on the utterance representation.--.

Cancel claim 24.

Cancel claim 26.

Reasons for allowance

2. Claims 1-5, 7, 9-13, 15-21, 23 and 25 are allowed.

It is noted that the closest prior art of record, Abella et al. (U.S. Patent 6,044,347) disclose methods for rule-based dialogue management using speech recognition, but Abella et al. do not teach generating an application specific goal derived from the utterance representation, wherein the application specific goal and the utterance representation are propositions comprising attribute-object-value triples, the proposition corresponding to the utterance representation being derived from a frame representation; and analyzing the utterance representation based on the application specific goal and a corresponding set of goal-directed rule's condition to the application specific goal that may be taken in a domain associated with the application specific goal; and generating a response based on the analysis of the utterance representation if ambiguous information is identified. Thus, independent claims 1, 9, 17 and 25 are allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.
